Michael Keenan - Summary of Individual Hours

Month	Hours	Justification
September, 2019	20	Researching current server monitoring solutions, specifically regarding their user-interface design. Figuring out what works, what doesn't work, and looking for inspiration regarding my personal design for Heimdall.
October, 2019	15	Rough draft of UX implementation, sketches for Login page, Create Account page, Dashboard, Agent List, Add New Agent modal, Logout modal, Agent Information page
November, 2019	15	Presenting drafts to team members, defending my designs, taking feedback and revising drafts based on that feedback
December, 2019	20	Researching different frameworks compatible with AngularJS and NodeJS for displaying of charts/graphs, as well as ideas for switching between agents
Fall Semester Total	70	
January, 2020	20	Create User Guide website along with user documentation pages
February, 2020	30	Create wireframes and proof of concepts for the pages and graph/chart implementations
March, 2020	10	Assist group members in connecting of frontend to backend logic
April, 2020	20	Fill in any remaining UX issues leftover after connection, create final design report page on user guide website
Spring Semester Total:	80	
Project Total	**150**
